**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 2, 11, 13-14 and 22, are rejected under 35 U.S.C. 102(e) as being anticipated by Braathen et al, US. Pat. No. 6,305,233 (*cited by Applicant*).

3. Claims 1, 2, 13-14 and 22, Braathen teaches an apparatus for detecting arrival time for a packet including a preamble [*title, abstract*], the apparatus comprising;

a receiver for receiving and demodulating a signal [*Fig. 7, abstract*];

a packet arrival time detector, coupled to the receiver, configured to correlate the demodulated signal with a stored preamble and output a packet arrival time at a symbol period boundary of the received signal [*abstract, col. 2, lines 5-14, col. 13, line 63 thru col. 14, line 23*].

4. Claim 11, Braathen teaches the packet arrival time detector outputs the packet arrival time to an equalizer [*abstract, col. 2, lines 5-66*].

***Allowable Subject Matter***

5. Claims 3-10, 12, 15-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
